

ASSIGNMENT

In book of 'Pilot Plant Design, Construction and Operation' (McGraw-Hill, 1992) written by Richard P. Palluzi defined pilot plant:

“Pilot plant is a tool intended to allow investigation of a process problem on a manageable scale in realistic manner and in a timely fashion”.

Write a general essay on pilot plants from the basics (characteristics, goals, purposes, advantages etc.) to the details (rule of thumbs, design, sizing, maintenance and operation).
