Chapter Description

- Expected Outcomes

At the end of this lesson you will understand:

- Image formats
- Image color scheme
- Image enhancement
- Video – Analogue and digital video
- Recording formats and standards
- Transmission of video signals
- Video capture
- Computer-based animation

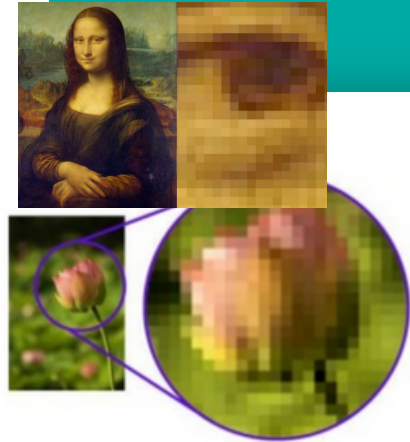

Graphics

- Graphics are an important part of the communication process.
- They can be used to:
 - Highlight information
 - Set a mood or tone
 - Provide examples
 - Serve as backgrounds
 - Hyperpictures

TYPES of Graphics

- Raster/Bitmap graphics
 - » Composed of **pixels** (bitmap).
 - » An array of pixels of various colors, which together form an image.
 - » Real images – captured from devices (camera/scanners).
 - » Data format: .GIF, .JPEG, .PNG, .TIFF.

■ Vector graphics

- » Composed of paths/lines/curves.
- » The data file for a vector image contains **the points** where the paths start and end, how much the paths curve, and the colors that either border or fill the paths.
- » Drawn on the computer – only require small amount of memory.
- » The images can be scaled to be very large without losing quality.
- » Represent images in computer graphics.
- » Data format: .EPS, .PDF, .PSD, .AI. (based on tools to edit).

Graphics design

- Graphics editing programs allow designers to draw, paint, or edit images.
- A combination of different graphic programs may be used in creating multimedia presentations.
- Determine the best balance between the size and quality.
- Use appropriate graphics for the intended purpose and audience.

- Choose appropriate file formats:
 - Standard for the internet:
 - » JPEG (Joint Photographer Experts Group)
 - » GIF (Graphics Interchange file format)
 - » PNG (Portable Network Graphics)

Most popular:

TIFF - Tagged Image File Format

BMP – Bitmap

PCX - Windows Paint

PICT - Macintosh

Image Enhancement

- In computer graphics, the process of improving the quality of a digitally stored image by manipulating the image with software.

OER Fundamental of Multimedia by Dr. Rahmah Mokhtar work is under licensed [Creative Commons Attribution-NonCommercial-NoDerivatives 4.0 International License](https://creativecommons.org/licenses/by-nc-nd/4.0/).

2 type of Image Enhancement

1. Programs specialized for image enhancement are sometimes called *image editors*.
 - The programs of software will helps to enhance and manipulate the image to increase the quality of the image
