

Tutorial 4

Conditional Statements

Design user interface as below.

You have to implement condition IF ... ELSEIF.....END IF statements when user selects the operation subtract, add, divide or multiply.

The screenshot shows a Windows application window titled "Form1". Inside the window, there is a user interface for a simple calculator. It features two input fields for numbers, with "6" and "8" entered. A plus sign "+" is positioned between the two input fields. Below the input fields, there is a "select operation" dropdown menu. The dropdown menu is open, showing four options: "+", "-", "*", and "/". Below the dropdown menu, there is a blue button labeled "TOTAL". Below the "TOTAL" button, there is an output field displaying the result "14".
