"Setakat ini, kami masih tidak mengetahui bagaimana perkara ini boleh terjadi " - penduduk

"Namun, kebanyakan warga di sini percaya air tersebut berubah kerana terdapat aktiviti membuang sisa-sisa cat atau pewarna ke dalam sungai,"

Raw sewage

Increased pollution is threatening the sustainable use of Lake Victoria, a vital resource for Kenya, Uganda and Tanzania, reports the BBC's Noel Mwakugu.

Each day gallons of raw sewage and rubbish flows into the lake from houses and industries near its shores.

In Kisumu, on the Kenyan side of the lake, sewage from 20% of homes flows into the waters.

-image of the **Victoria lake** being amongst the most polluted lakes in the world, and that its waters are responsible of a large number of endemic deceases in the area.
