Mamdani Inference

Fuzzification of
Input variables

Rule
evaluation

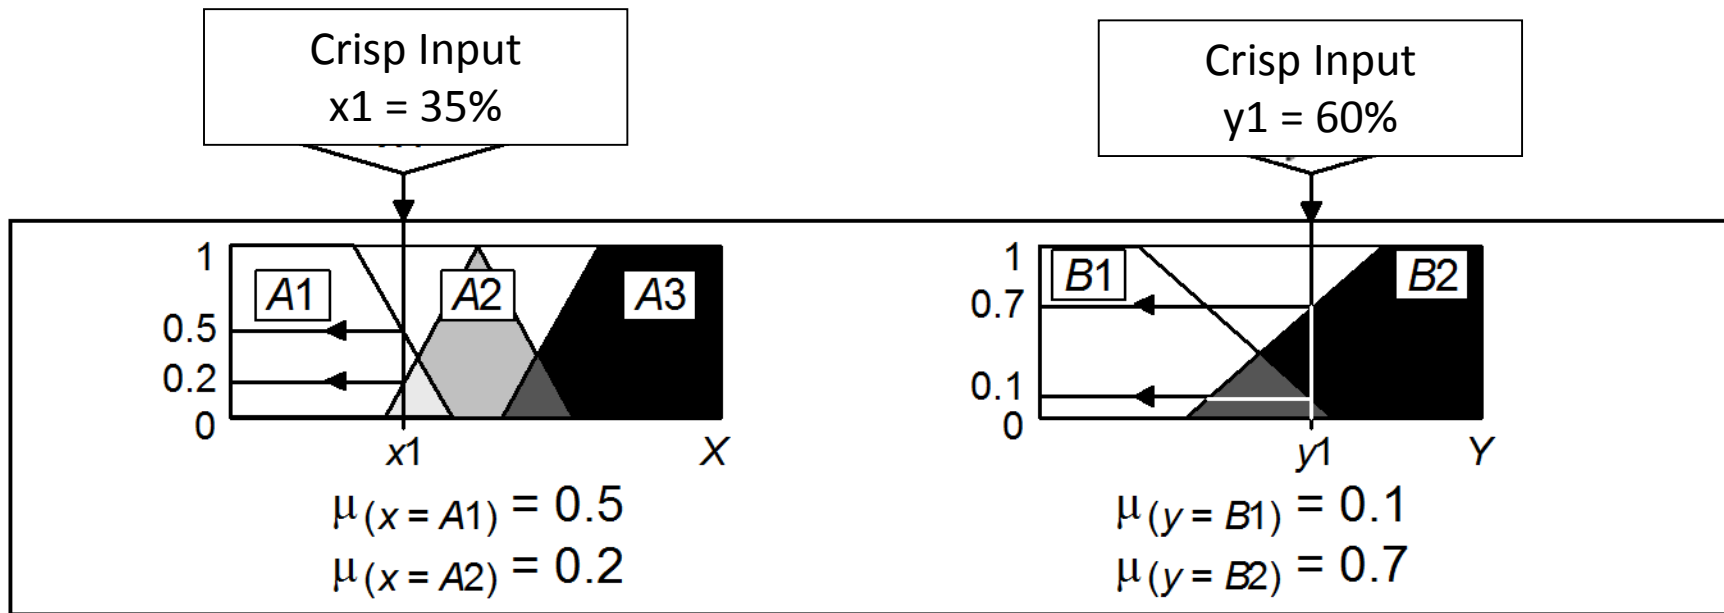

Aggregation of
Rule

Defuzzification

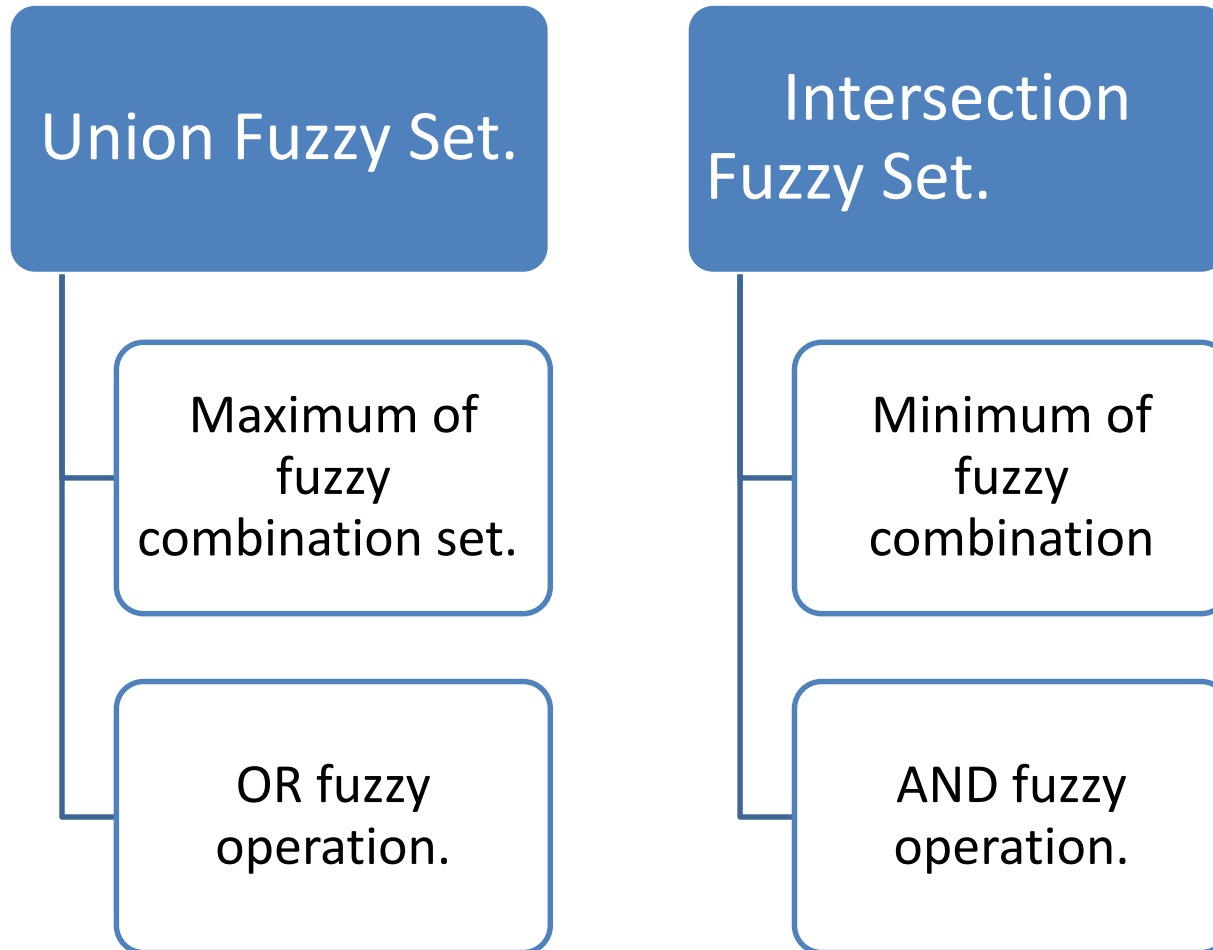

Expert System by
N.M.A Ghani

Step 1 : Fuzzification : Fuzzy sets of inputs

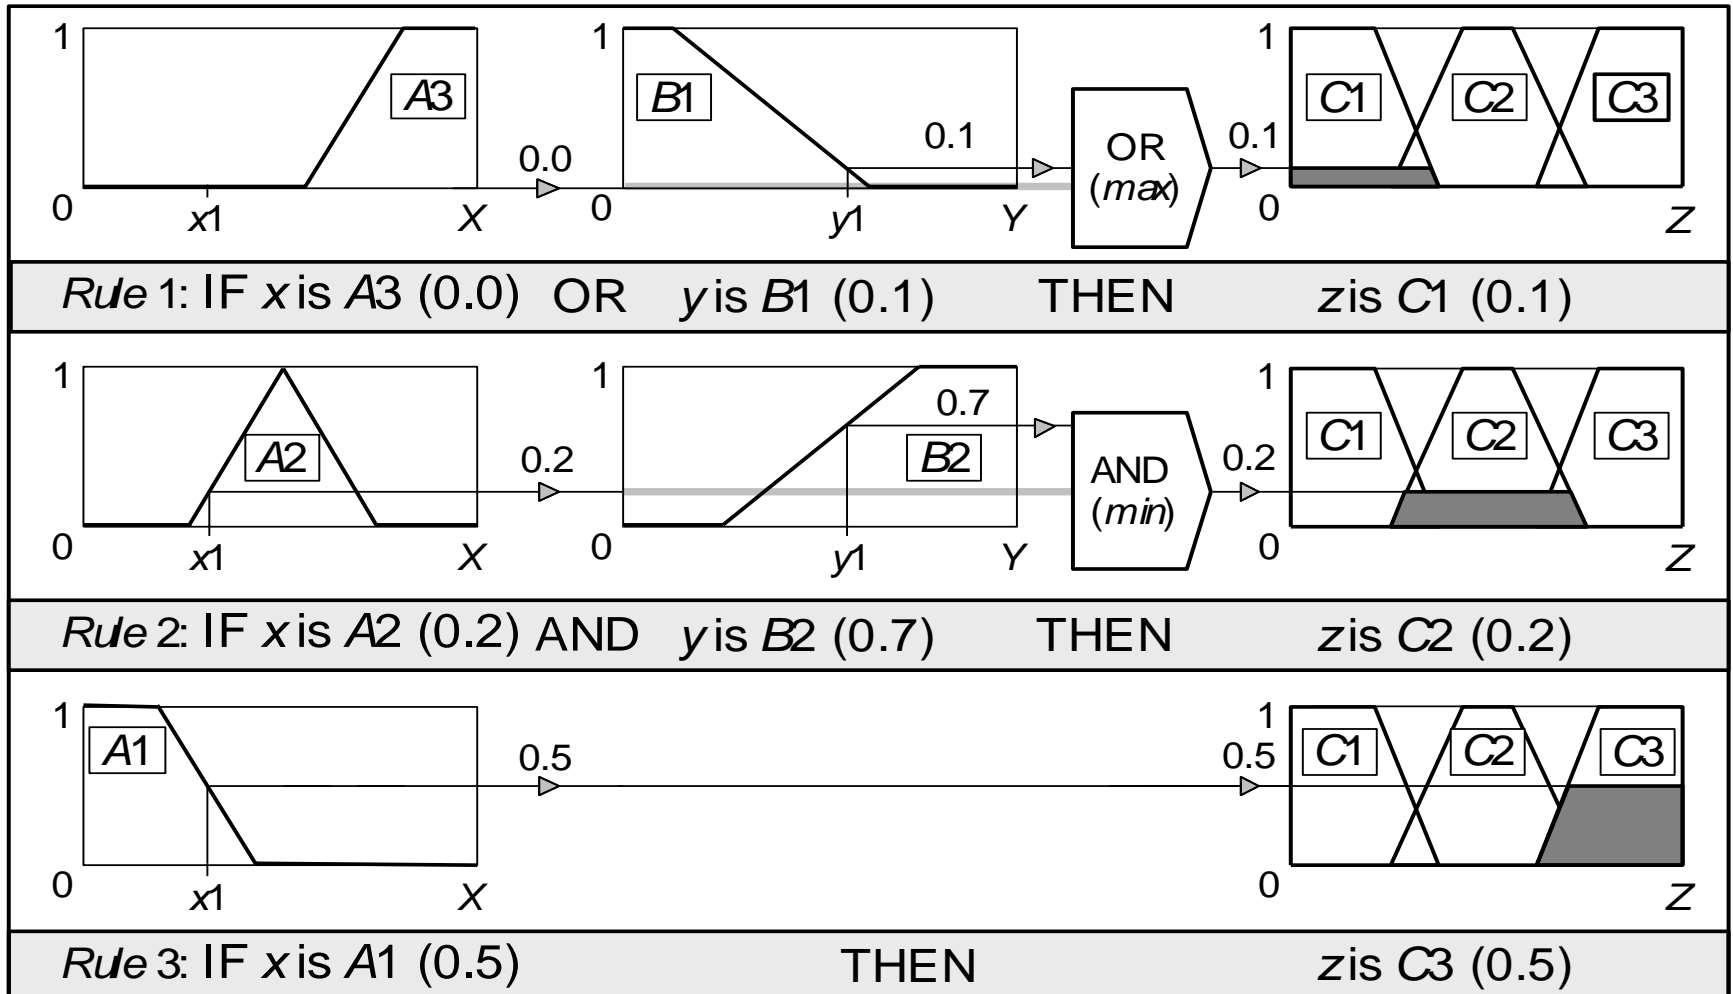

<http://slideplayer.com>

Step 2 : Rule Evaluation

Mamdani-style rule evaluation

Step 3: Aggregation of the rule outputs

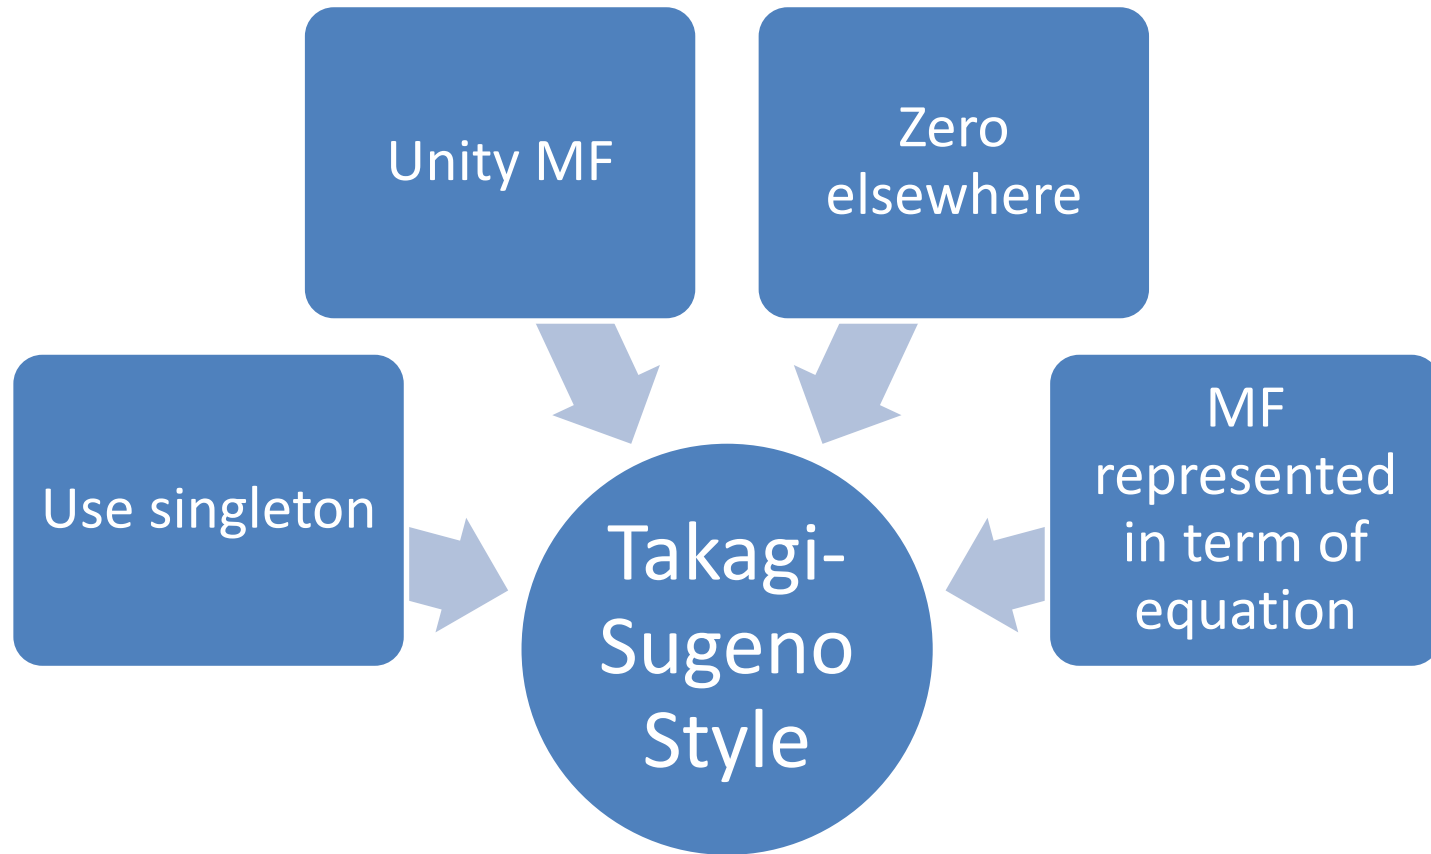

<http://slideplayer.com>

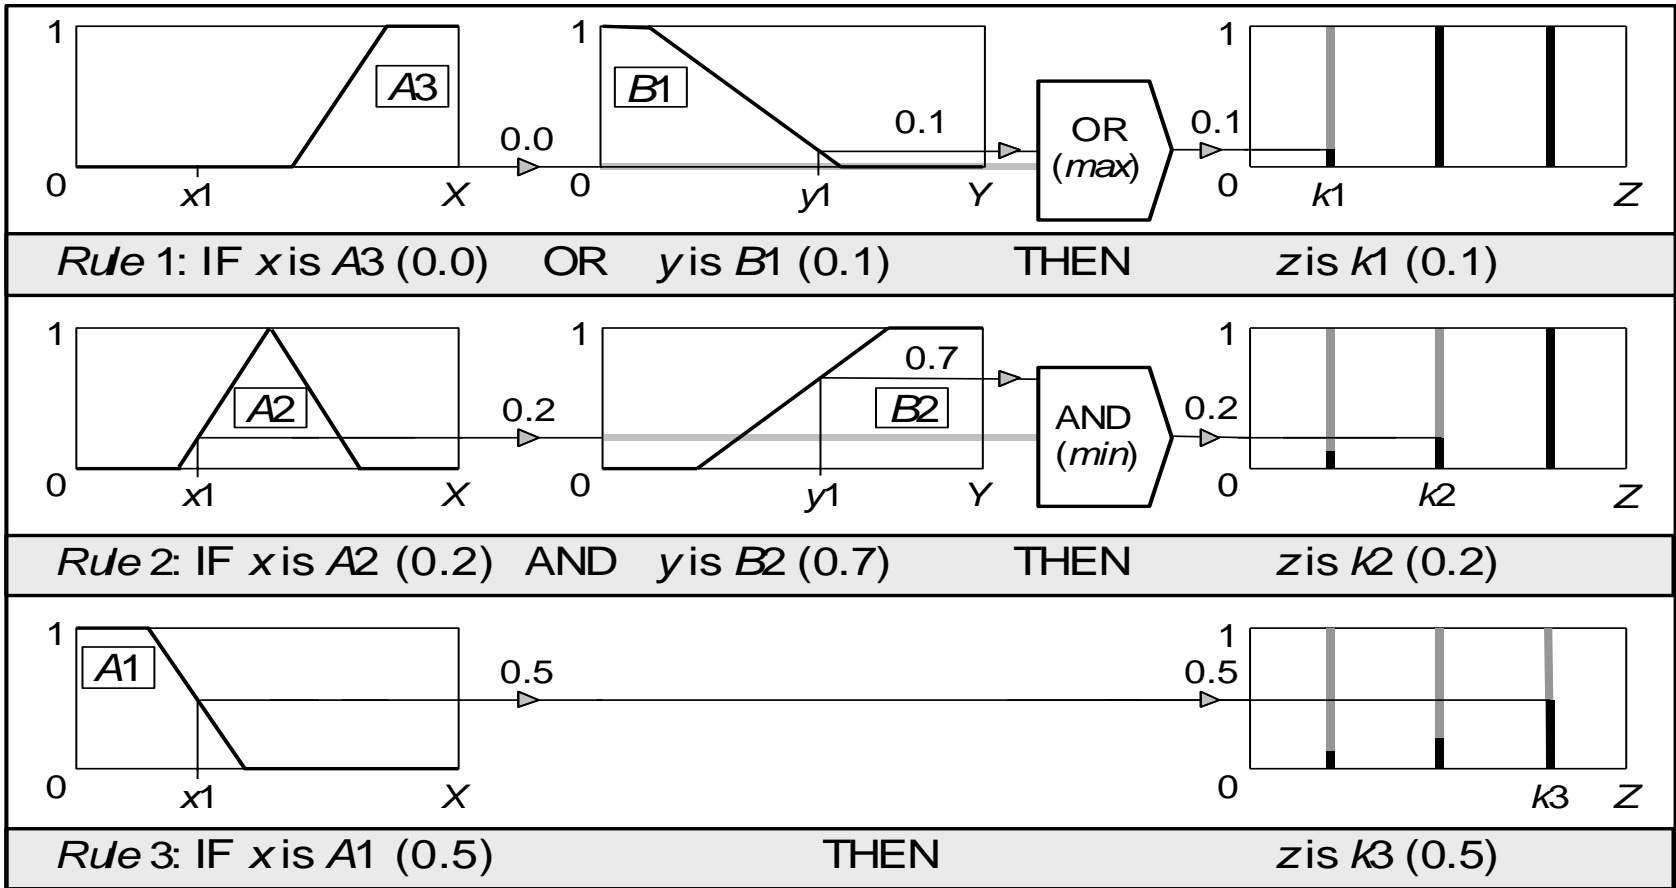

Step 4: Defuzzification

$$\text{COG} = \frac{\int_a^b \mu_A(x) x \, dx}{\int_a^b \mu_A(x) \, dx}$$

Sugeno-style Inference

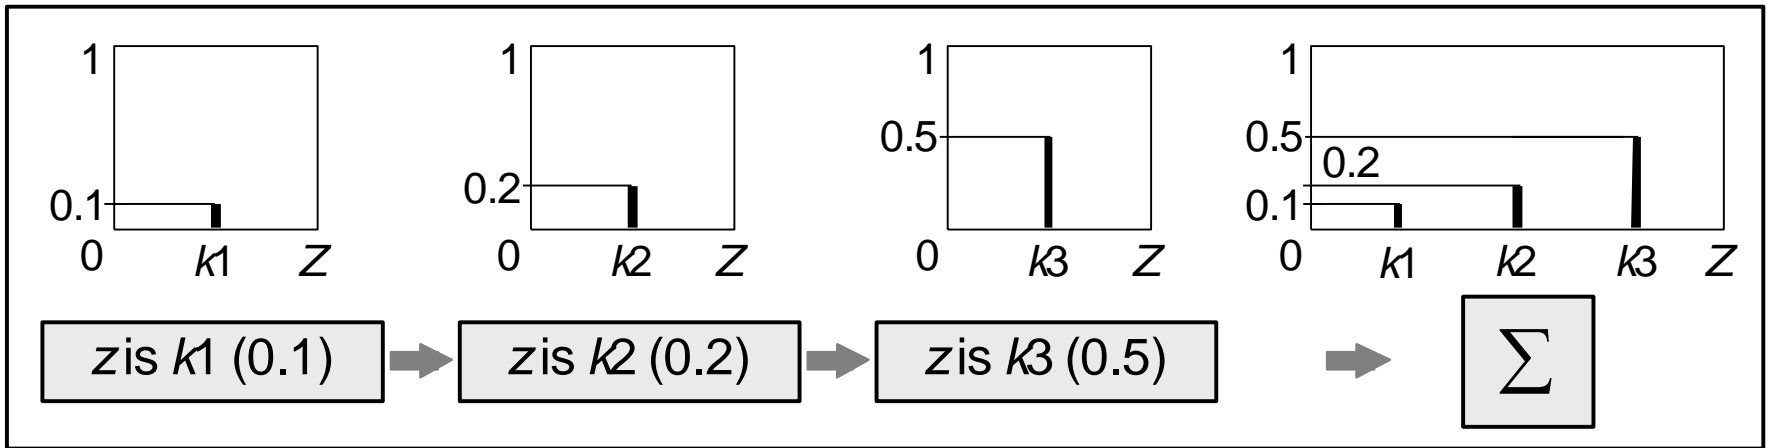

Sugeno-style inference

N.M.A Ghani

Weighted average (WA) defuzzification:

$$WA = \frac{\mu(k_1) \times k_1 + \mu(k_2) \times k_2 + \mu(k_3) \times k_3}{\mu(k_1) + \mu(k_2) + \mu(k_3)} = \frac{0.1 \times 20 + 0.2 \times 50 + 0.5 \times 80}{0.1 + 0.2 + 0.5} = 65$$

Mamdani vs Sugeno

Mamdani	Sugeno
Output membership function	No output membership function
Output distribution	No output distribution only 'resulting action': Mathematical combination of the rule strength and the output
Crisp result obtained through defuzzification of rules' consequent	No defuzzification: crisp result is obtained using weighted average of the rules' consequent
Non-continuous output surface	Continuous output surface
MISO and MIMO systems	Only MISO systems ¹
Expressive power and interpretable rule consequents	Loss of interpretability
Less flexibility in system design	More flexibility in system design; more parameters in the output

[Hamam, A.](#); [Georganas, N.D.](#); 2008

Mamdani vs Sugeno Cont'd

Mamdani

Widely used in engineering problem.

More human-like manner.

Sugeno

Computationally effective.

Work well with optimization.
