LEARNING ACTIVITY # 2

INDIVIDUAL TASK

Keeping the idea of leasing and purchasing, assume that a procurement manager intended to lease a pumping equipment required for his upcoming project at a rate of MYR 800/day. On the other hand, the purchasing cost of the same equipment is MYR 12,000 in addition to a daily operational cost of MYR 400/day. The duration of project is 90 days.

How long will it take for the purchase cost to be the same as the lease cost?
