

### **Laboratory Report Guideline**

Students **must** follow the following instructions during the preparation of BTE1112 post-laboratory reports.

Each students need to **prepare one report** for every labsheet provided. The report is due **after one week** from the date of performance of a laboratory.

The report should have **SIX (6)** items. These are:

**1. Front page – as provided labsheet’s front page**

**2. Introduction**

Introduction and all the necessary background principles for the experiments

**3. Components and Methods**

Cover all the important experimental details and written in paragraphs

**4. Result**

All figures, graphs, tables are correctly drawn complete with number and content titles/captions for each experiments

**5. Discussion**

Discuss all the important trends and data comparisons for each experiments

**6. Conclusion**

Conclude the achievement of laboratory objective.

Note: Please attach the **marking rubric for laboratory report** after your front page during submission for marking purposes.
