

FUNDAMENTAL OF DIGITAL MEDIA DESIGN [Chapter 6: Introduction to Audio]

Activity

1. Download the two MP3 files below:
 - [guitarsinger.mp3](#) (1.1 MB)
 - [narration.mp3](#) (504 KB)
2. Edit them in Audacity as shown in the [video tutorial](#).
3. You may import these two files directly into Audacity without converting them.

Editing process:

1. When you save your project in Audacity, name it with your own FIRST NAME.
2. Rename all the tracks in the project. DO NOT use the same track names that you see in the tutorial. Choose different suitable name.
3. Duplicate three different segments from the narration track.
4. Delete the master narration track.
5. Edit the music track as shown in the tutorial to allow the three narration segments to be heard clearly at three different locations in the project.
6. Export your audio file to mp3 format & name it as your “StudID_YourName.mp3”
