**Lab Exercise 4: Basic GUI Development**

> Imagine you are given the task of designing an airline reservation system that keeps track of flights for a commuter airline. List the classes you think would be necessary for designing such a system. Describe the data values and methods you would associate with each class you identify.

REMEMBER THIS PROBLEM?
HOW WOULD YOU DESIGN THE GUI
OF THIS SYSTEM??

Based on the given problem, develop the Graphic User Interface using drag-drop components for the system. Your GUI must have elements from swing container, control and menus. The system should at least have 10 components.
