

 Universiti Malaysia PAHANG <small>Engineering • Technology • Creativity</small>	COURSE: Mobile Application Development		MARKS:
	TOPIC: All		
	LAB ASSESSMENT	NO: 7	DURATION: Lab

Individual assignment requirements:

In any mobile application, alerts are pretty critical for communicating with your user. There are different ways that can be used to help your apps user to do the correct action easily. These alerts include Toast, Snackbar, and Dialog, based on that, you have to do the following:

- 1) Find information about those alerts and design a simple application that include those kind of alerts.
- 2) Write the complete java code for your application and implement the application on android studio.
