--

You are a research and development (R&D) engineer in an electrical and electronic company in Malaysia. You are required to form a group with your college in maximum 3 persons and working together to write a research proposal. Your research proposal is limited to the application of electrical or electronic engineering for benefit of society or environmental.

The proposal should contain the following items:

1. Research title
2. Research Background & Description with Literature Cited (include problem statements)
3. Objectives
4. Methodology
5. Expected outcomes
6. References
7. Gantt Chart (Appendix)

Please use the provided form (softcopy) as the format of your research proposal.

Due date:

[50 Marks]
