

### Question 1

An aluminium rod with 2.0 cm diameter and 10 cm length has a density of  $2.70 \text{ g/cm}^3$ .

- What is the mass of the aluminium rod (in grams)?
- How many atoms are there in the aluminium rod?
- What is the mass of one atom of aluminium (in gram)?

### Question 2

Table below shows atomic number of 4 different elements.

Element	Atomic number
1	16
2	26
3	29
4	35

- Determine the name of element with the following atomic number.
- Describe to which group does each element belongs to, and
- Write *spdf* electron configuration notation for each element.
