Technical Informatics 1: Dr Fatimah

Quiz 5

- Aims
 - Familiarise students with functions and arrays
- Expected Outcomes
 - Students are able to program codes that require the use of user-defined functions and all other concepts learnt throughout the course
- References
 - Harry H. Cheng, 2010. C for Engineers and Scientists: An Interpretive Approach, McGraw Hill

Quiz 5

Write a function called `printarray` which prints out the numbers in the array passed to it as a parameter.

- The function has two input arguments: the first argument is the array of type `int` that is to be printed out, the second argument is the number of elements in the array.
- The function does not return any value.

Quiz 5

```
#include <stdio.h>
int main(){

    int arrayA[10] = {0,2,4,6,8,10,12,14,16,18}
    /*Write answer below*/

    return 0;
}
```
